

### It reduces food waste

The can is available in a wide range of different portion sizes. This makes it easier to **choose the right can size for every occasion, reducing food spoilage significantly.**

### It has a long shelf life

The can is impermeable to **light, hermetically sealed and available in a wide range of different portion sizes, protecting the content against all types of external contamination.** This means food stays fresh for longer, no matter where it is stored.

### It's infinitely recyclable

Made from **steel or aluminium, permanent materials that can be fully recycled again and again without loss of quality,** the food can is a great fit for the circular economy.

### Recycling it helps save energy and carbon emissions

Recycling food cans helps to **lower overall energy consumption** in the production of cans by up to 70% and **significantly reduces equivalent carbon emissions.**

### It even reminds you to recycle

More and more brands are using the **Metal Recycles Forever logo** to effectively communicate the **infinite recyclability of the food can** and remind us to recycle, so look out for the logo on your next food can!

### It provides you with healthy and nutritious food

Getting food from farm to can is a simple process that **preserves food at its peak, with no need for preservatives.**

### It's easy to recycle

Food cans are made from the most recycled material in the world. This means they're not just recyclable, **they're actually recycled!** Once used they just need to be placed in the correct bin. Then they'll be collected, sorted and recycled into new packaging and products.

### It's becoming increasingly lighter

Continuous efforts to reduce the weight of food cans have **significantly reduced the environmental impact of producing cans and transporting and storing foods.**

### It's filled at high speed

Metal's inherent strength and magnetic properties enable **fast and efficient filling of cans** with high precision at an impressive speed of up to 500 cans per minute.

### It's strong and unbreakable

The inherent and unbeatable strength of the food can makes it **ideal for the protection of food products and the perfect option for efficient transport and storage.**

**When it comes to safe, sustainable and versatile packaging, it's hard to beat the food can.**  
**Read on to find out why!**
